Mama Hyzy

Brand ambassador Neno 2021

DEAR MOTHER!

Every moment of relaxation or spent with your child is worth all the world's treasures. That's why you shouldn't waste your time on activities that can be carried out by devices designed just for that task! The mission of the Neno brand is to truly support young mothers with our products during this most beautiful, but also most difficult part of their lives. That's why breast pumps, nasal aspirators, nebulizers, baby monitors, thermal bowls, toothbrushes and other Neno brand products can help make everyday life easier and more comfortable, both for the parents and the baby.

A photograph of a woman with long dark hair, wearing a white tank top, smiling and holding a baby. The baby is wearing a white onesie and is looking towards the woman. The background is a soft, out-of-focus light color. The image is framed by a large, semi-transparent pink circle on the left and a green circle on the bottom right.

TWO WORK MODES

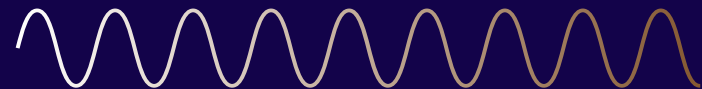

Neno Bella Twin is a wireless double breast pump, designed for mothers that wish to return to work or spend their time actively, but who don't want to stop breastfeeding their children. It's the newest, double version of our bestseller - the Bella breast pump, chosen by thousands of mothers already.

1 *stimulation mode*

In stimulation mode, the breast pump makes intensive, shallow suctions. This mode stimulates mammary glands in your breasts, ensuring better milk flow.

2 *deep expression mode*

Long, deep suctions provide you with efficient breast milk expression.

THE BABY'S NATURAL RHYTHM

The technology used in *Neno Bella Twin* is true to life imitation of a baby's natural suckling, making it a very efficient method of breast milk expression. Phase 1 is quick, shallow suctions. It stimulates the mammary glands and it can be regulated in a range of 6 levels. Phase 2 is deep milk expression through slower, deeper suctions with 9-level power adjustment.

DOUBLE BREAST PUMP

A double breast pump provides you with comfort, saves your time and improves lactation. The **Neno Bella Twin** breast pump has suction power settings - it adjusts itself to your needs, letting you painlessly express breast milk. If you need to, you can also use Neno Bella Twin as a single breast pump.

ELEGANT DESIGN

The Neno Bella single breast pump was well received by many mothers because of its slick design and functionality. That's why we made the double version of it even prettier. The pumping station is covered by a layer of special powdered paint, giving it a satin-like shine. The finishing touches and logo on the device are in the same gold hue that so many mothers love already.

STRONG BATTERY

Neno Bella Twin is a breast pump that can be used anywhere. You can express milk at work, on vacation or on a trip. After 2 minutes of stimulation, the device automatically switches to expression mode and turns off after a total of 30 minutes of work. Just sit down comfortably and let the breast pump do all the heavy lifting.

A lithium-ion battery of the device supports up to 2 hours of work. To charge it, just connect it to power using a USB cable.

EASY STERILIZATION

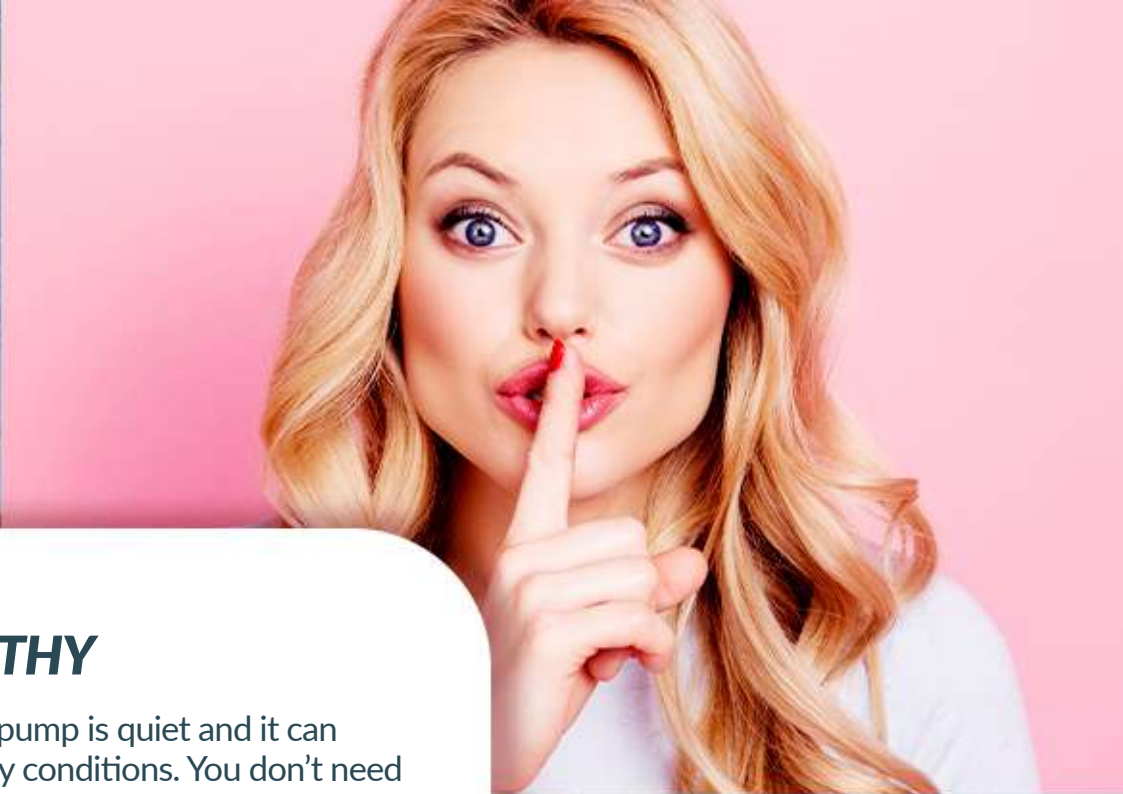

Neno Bella Twin is made out of few elements, making it easy to disassemble and sterilize. Remember - don't use medical alcohol for sterilization. Use boiling water or a steam sterilizer like *Neno Vita* instead.

SAFE

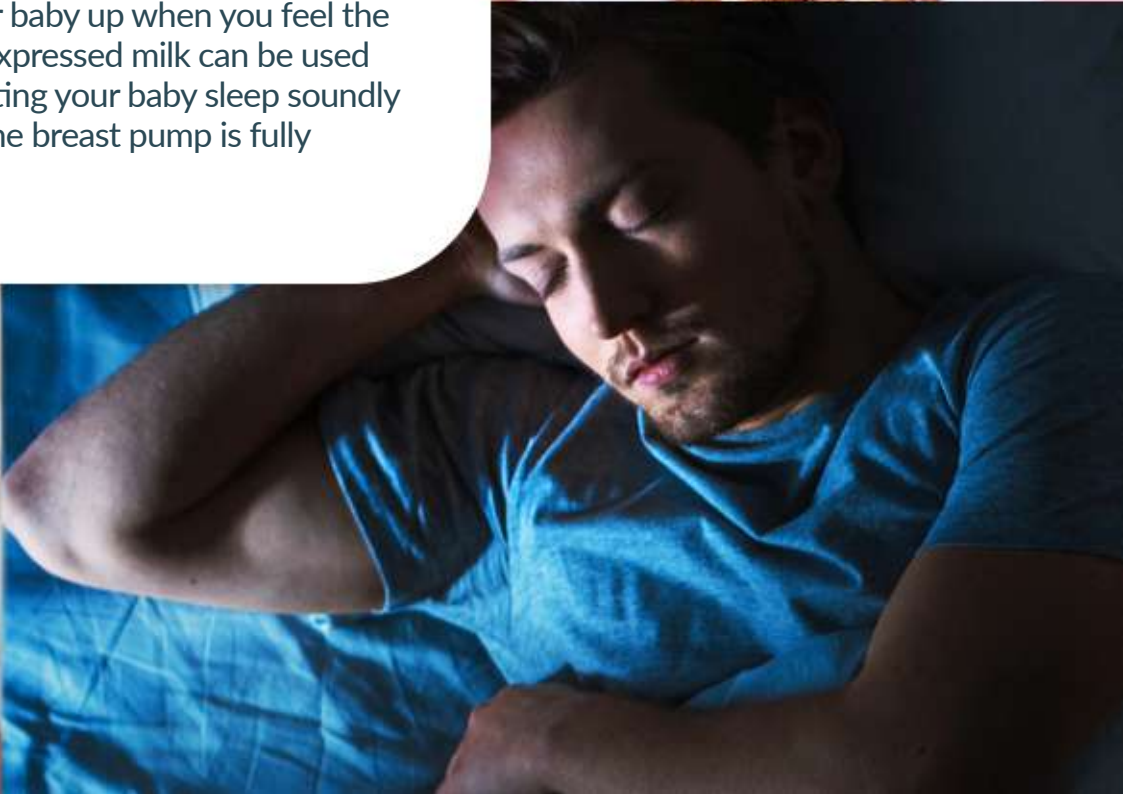

All parts of the device are free from harmful bisphenol, letting the breast pump safely come in contact with food, including breast milk.

The breast pump is specially designed to prevent milk backflow, keeping it fresh and keeping the young mother using the device safe.

QUIET AND HEALTHY

The *Neno Bella Twin* breast pump is quiet and it can be discreetly used under any conditions. You don't need to worry about waking your baby up when you feel the need to express milk. The expressed milk can be used during the next feeding, letting your baby sleep soundly and keeping you healthy. The breast pump is fully *BPA-free*.

2 min.

30 min.

SMART SCREEN

The display screen of the Neno Bella Twin breast pump is clear and easy to read. It informs you about the currently chosen work mode, power settings and remaining battery power. The Neno Bella Twin breast pump will remember your preferred settings. When turning the device on, it will automatically switch to mode and power settings used by you before.

DELICATE BREAST SHIELD

The breast shield is made out of delicate, BPA-free, Japanese silicone. The ergonomic shape of the funnel can adjust itself to all breast shapes. The breast shield is best suited for use with teats that are between 18,5 mm and 21,5 mm in diameter. The breast shield provides comfort and is safe for your skin. There are also different sizes of breast shields offered by Neno: 21 mm and 27 mm.

UNDER CARE

The *Neno brand* is most often recommended by mothers, midwives and lactation experts. Our products are dedicated for young parents, making their daily lives easier and letting them enjoy their time with their children.

neno[®]

A NENO LAYETTE

Breast pumps, milk bottles, sterilizers, thermometers, baby monitors and much more... Learn how you can make your daily life easier, complete a layette for your baby and earn more precious moments for both yourself and your child.

SAFELY STORING YOUR MILK

When your breasts are too heavy with milk, you can easily express it, freeze it and use it later. Use special Neno bags for milk storage that can be connected directly to a Neno breast pump.

EASE OF USE WITH NENO

All Neno breast pumps and milk bottles are compatible with each other, letting you choose a bottle that fits your needs. The bottle is connected directly to the device. The breast pump comes with a 150 ml milk bottle and it can be replaced with 180, 240 or 300 ml bottles, depending on the needs and age of your child.

TAKE IT WITH YOU

The *Neno Bella Twin* breast pump will look perfectly anywhere. The device has elegant, feminine design that will attract the attention of many mothers. The breast pump is light and handy, letting you easily fit it into a big purse to take with you to work, letting you express milk whenever you need.
