*inspired by Children,  
designed for Parents.*

**bottle 150**  
BABY BOTTLE

## ***FITS ANY NENO BREAST PUMP***

All Neno breast pumps were designed to use baby bottles of the same size - Neno Bottle 150. All future models are also going to be designed around using this bottle size.

## **ANTI-COLIC**

The teat of Neno Bottle 150 was designed with children's health in mind. The teat fits the baby's mouth, thanks to which it doesn't let any air in during feeding. Colic is one of the most common reasons why babies cry.

**Neno**

## ***SOFT SILICONE TEAT***

The delicate, soft material used to make the teat makes sucking on the bottle easy and pleasant for any baby.

## **FOR SMALL CHILDREN**

Neno Bottle 150 can be used to feed children from the day they are born. The teat and bottle are safe to use with newborn children.

## **CAPACIOUS**

Neno Bottle 150, as the name suggests, can hold up to 150 milliliters of milk. It will serve your child for many months.

# TECHNICAL SPECIFICATION
