mode

# NIGHT MODE

*The night mode provides peaceful sleep for the child and the parents. You can easily keep an eye on your child, even in the complete darkness. The baby monitor Neno Gato2 automatically turns on infrared LEDs when the light goes out, so the footage is always readable. The IR illumination is invisible to the human eye, so it would not wake your baby up from sleep.*

# TWO-WAY COMMUNICATION

The Gato2 Baby Monitor provides you with information on what is happening in the children's room when you are busy with other duties. Just turn on voice communication to hear sounds from the baby's room, even when the door is closed. This function can be used even when your baby grows up to communicate with each other.

## LIVE VIEW

*Thanks to the easy-to-read display Neno Gato2 wireless baby monitor, enables constant observation of your baby.*

Neno Gato2's receiver has a built-in rechargeable battery. You can take it with you without fear of missing its power. You can charge it using the attached tool power supply kit.

**CONSTANT CARE**

# BIG DISPLAY

The portable receiver has a 2-inch screen where you can easily observe if the baby is sleeping in the correct position or the face is not covered with a quilt, or the baby just has woken up.

The electronic baby monitor Neno Gato2 is composed of the transmitter with the camera that you are setting in the child's room and a lightweight portable receiver that you can always have with you. Connectivity is based on radio waves - safe for you and your baby.

## PORTABLE RECEIVER

## A WIDE RANGE OF WORK

*You can drink coffee, rest, and go to the bathroom or the garden. The wireless and long-range operation of the Neno Gato2 baby monitor is guaranteed up to 260 meters outdoors! You can take care of your baby without giving up pleasures and daily rituals.*

## BUILT-IN LULLABIES

*The baby monitor also allows you to play lullabies for your baby. The device has eight built-in melodies that will help your baby fall asleep peacefully.*

Our electronic Neno Gato2 operates in Vox standby mode. This ecological sleep mode allows you to save the battery. The camera will automatically wake up when it registers noise in the child's room.

STANDBY MODE VOX

## TEMPERATURE SENSOR

Parents are not able to watch over their babies 24 hours per day. That's why baby monitors exist. Neno Gato2 also allows you for temperature monitoring - you can easily check if your baby is not too hot or too cold.

## ELDERLY CARE

*Your baby has already grown up but the baby monitor does not have to be put aside. Neno Gato2 is a great way to monitor the elderly or sick. Two-way communication, measurement of temperature - this is also useful for seniors.*
