

### **neno<sup>®</sup> beauty** Mica

Thermo-sonic facial cleansing brush – combines sonic vibrations with a heating function up to 55°C, ensuring deep and effective cleansing while preparing the skin for further care. With six working modes, ultra-soft silicone bristles, waterproof design, and compact form, it's convenient, hygienic, and suitable for all skin types.

### **neno<sup>®</sup> beauty** Alva

LED Mask – improves the condition of the skin using 220 diodes emitting four precise wavelengths of light. It supports skin regeneration, firming, and brightening. The device offers three programs (soothing, brightening, rejuvenating), has an automatic timer, and operates wirelessly. Its lightweight design ensures comfort during use.

## *Exclusive Series*

### **neno<sup>®</sup> beauty** Vio

Ionizing blow-dryer and curling iron – comes with five interchangeable styling attachments. The curling attachment allows for automatic wrapping of hair strands with the airflow and enables changing the curling direction. The device features four temperature settings, three airflow speeds, and a concentrator nozzle, giving full control while styling the hair.

### **neno<sup>®</sup> beauty** Silvia

Ionizing hair dryer – offers five temperature levels and three airflow speeds, allowing customization for different hair types and styles. The memory function saves the last used settings. Its quiet operation enhances user comfort without disturbing household peace.

## Beauty begins with you

### nenob<sup>®</sup> beauty Algo

Face firming and contouring device with EMS and RF technology – offers three working modes with two intensity levels. It has a diamond massage head and a flat tip that emits red and yellow LED light. The memory function and automatic timer facilitate daily care, while the lightweight design ensures comfortable use.

### nenob<sup>®</sup> beauty Naya

Face massager with EMS technology and thermotherapy with dual massage heads – uses stimulation, vibrational massage, and heating up to 42°C, supporting improved facial muscle tension and skin elasticity. The device offers five intensity levels, memory function, and an automatic timer. The massager is compact and wireless.

### nenob<sup>®</sup> beauty Luve

Multifunctional facial care device – combines microcurrents, microelectric impulses, electroporation, EMS, four light wavelengths (blue, yellow, green, red), and vibrations. It offers four working modes and five intensity levels, supporting skin firmness, hydration, smoothness, and brightness. The compact, wireless design with a skin contact sensor and automatic timer ensures comfort for daily use.

### nenob<sup>®</sup> beauty Auri

5-in-1 lifting massager for the face and neck – combines EMS technology, RF, red LED light, sonic vibrations, and a Gua Sha-shaped massage head to support skin firming, microcirculation improvement, and even skin tone. It offers two working modes with adjustable intensity, memory function, and an automatic timer. The lightweight, ergonomic design and included storage pouch make it easy to use and store.
